

Knife gate valve HX

An extreme high pressure knife gate valve with through-going gate

Size range:

DN 150 - DN 900 (6" - 36")

About HX

This is a through-going knife gate valve for extremely high pressures and demanding operating conditions. The HX offers offers superior flow characteristics and reliable bi-directional zero leakage shut-off on highly concentrated media and static media columns.

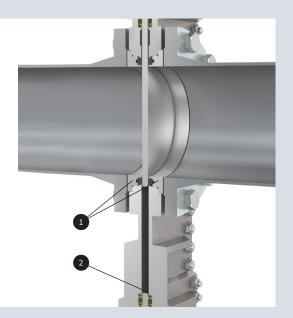

The HX valve is modular designed and it can easily be customized in materials, with actuators and related automation accessories to different process conditions. It can operate on different media such as pulp stock up to 18 % concentrations, slurry, liqour, and granulate. The valve has an extra solid two piece precision machined valve body with a high strength top works that provide an essential and precise gate alignment. As standard it is available with a valve body in stainless steel, but it can also be supplied in a range of high alloy materials such as Duplex, 254 SMO and Titanium. With Stafsjö's retainer ring system you can repeatedly extend the service life, while minimizing downtime and cost.

The HX valve is one out of five valves in Stafsjö's product range with through-going gates. The HG valve represent the standard. HL is a compact version of HG while HP is high pressure version. HPT is a high pressure version entirely made in Titanium.

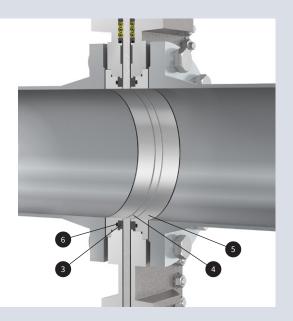

Reliable through-going and bi-directional zero leakage shut-off

The through-going gate is guided and internally supported throughout the entire stroke. It can operate smoothly through difficult and highly concentrated media. The retainer ring system (1) on both side of the gate provide a tight seal independent of pressure direction. On each opening stroke the lower machined flat gate orifice (2) force media upward and back into the pipe.

Full bore with outstanding flow characteristics

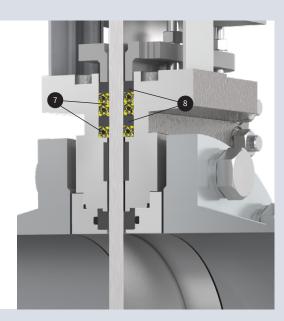

When the HX knife gate valve is in open position, it offers an unobstructed flow path where no media can collect. The enlarged and reinforced PTFE seats (3) are protected by the gate (4) and retainer rings (5). The internal back-up o-rings (6) keep the seats pressurized against the gate.

Reinforced gland box sealing system enable a tight seal to environment

The increased body and gate thickness makes the gland box sealing system steady and reliable at high pressure loads.

Stafsjö's TwinPack (7) braids and the reinforced PTFE scrapers (8) ensure no media reaches surrounding environment.

Pressure class

Max working pressure at 110 °C		Max differential pressure at <u>110 °C</u>					
DN	bar	DN	bar				
150 - 800	20	150 - 800	20				
900	16	900	16				

Configurations

Standard

Sizes: DN 150 - DN 900

Valve body: Stainless steel EN 1.4408 Retainer rings: Stainless steel EN 1.4408

Gate: ≤ DN 350 stainless steel EN 1.4404, AISI 316L.

Gate: ≥ DN 400 duplex stainless steel EN 1.4462, S32205

Box packing: TwinPack including extra PTFE scrapers

Top works: Stainless steel tie rods encapsulated in aluminum beams

including stainless steel gate guards on automated valves

Options

Valve body1)

Stainless steel EN 1.4408 Duplex stainless steel EN 1.4470

Equivalent material to 254 SMO stainless steel

Titanium ASTM B265 Grade 2

Retainer rings

Stainless steel EN 1.4408

Duplex stainless steel EN 1.4470 Equivalent material to 254 SMO stainless steel

Titanium ASTM B265 Grade 2

Gate material and surface treatments

Stainless steel EN 1.4404, AISI 316L Duplex stainless steel EN 1.4462, S32205 254 SMO stainless steel or equivalent Titanium ASTM B265 Grade 2

Hard chromed surface

Extra polished surface (max Ra 0,8)

Seats

PTFE with o-ring in NBR, EPDM or FPM/FKM

Box packings

TwinPack with PTFE scrapers WhitePack with PTFE scrapers

Top works

Stainless steel tie rods encapsulated in aluminum beams Stainless steel pillars or beams²⁾

Actuators

Bevel gear Chain wheel

Hand wheel with non-rising stem

Double-acting pneumatic cylinder Single-acting pneumatic cylinder

Electric actuator Hydraulic actuator

Flange drillings

Accessories

See our accessory data sheet for automation options.

Design standards

Design, manufacturing, inspection and test

According to pressure equipment directive 2014/68/EU category I and II module A2. The valves are CE marked when it is applicable.

Stafsjö's valves are subject for pressure tests before delivery in opened and closed position with water at 20 °C according to EN 12266-1:2003 rate A. No visually detectable leakage is allowed for duration of the test.

On request Stafsjö can provide 2.2 test report and 3.1 inspection certificate according to EN 10204.

Contact Stafsjö for further information on ATEX approved solutions.

Face-to-face dimensions

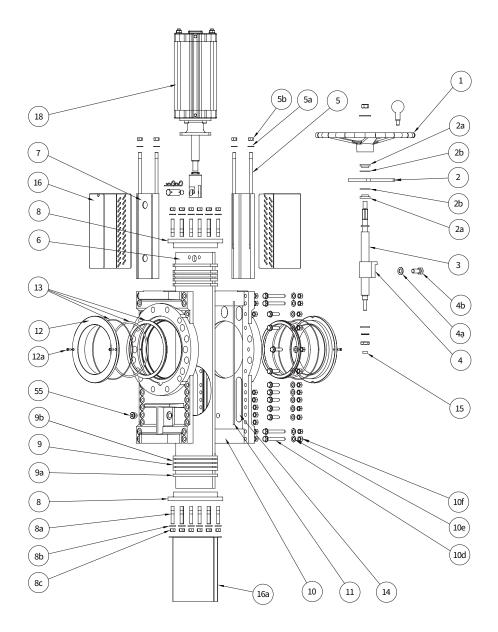

Stafsjö manufacturing standard.

Service temperature

Information to determine minimum and maximum temperature for the knife gate valve is available on stafsjo.com/support/temperatures/.

¹⁾ The valve body is as standard supplied with G1/2" purge ports.

^{2) 1)} Standard on valves supplied with valve body in Duplex, equivalent material to 254 SMO stainless steel or Titanium.

Part list

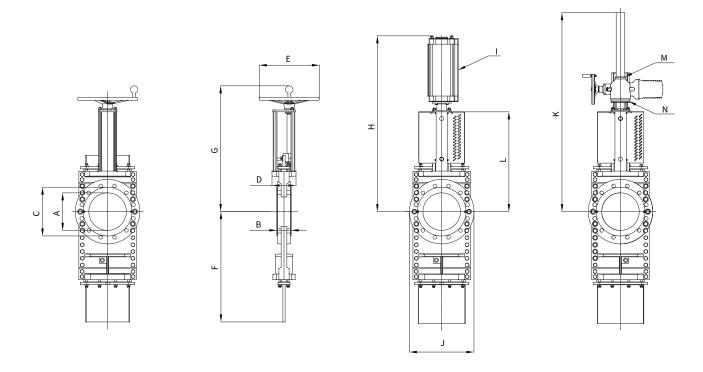

Pos.	Part	Material
1	Hand wheel	Coated cast iron EN-JL1030, GG20
2	Yoke	Stainless steel EN 1.4301
2a	Bearing	Brass
2b	Slide washer	POM
3	Stem	Stainless steel EN 1.4104, EN 1.4305
4	Stem nut	Brass
4a	Washer	Stainless steel A2
4b	Screw	Stainless steel A2
5	Tie rod	Stainless steel A2 ⁵⁾
5a	Washer	Stainless steel A2
5b	Nut	Stainless steel A2
6	Gate	See options on page 4
7	Beam	Anodized aluminium ⁵⁾
8	Gland	Stainless steel EN 1.4408

¹⁾ Recommended sizing of double-acting pneumatic cylinder type SC at normal operation with 5 bar air pressure. For other operating conditions, contact Stafsjö or your local representative for advice.

Main dimensions are only for information. Contact Stafsjö for certified drawings.

²⁾ Recommended sizing of Auma SA electric motors at normal operation. For other operating conditions, contact Stafsjö or your local representative for advice.

³⁾ Valve and Auma SA interface. The electric motors are mounted as standard with output drive type A (rising stem) according ISO 5210.

¹⁾ Weight in kg for the valve with double-acting pneumatic cylinder, DN 800-DN 900 with electric motor.
